

# The Claresholm Advertiser

Vol. 2, No. 28

CLARESHOLM, ALBERTA, THURSDAY, OCTOBER 28, 1915

Subscription, \$1.50 Per Year in Advance

## Local and General

It is interesting to note that Mr. G. Boddy of the Kingstons & Boddy Ranch, is now fighting in the trenches in France.

Mr. Adlam, music instructor at the Mount Royal College, Calgary, was in town a few days last week.

E. Grandison, of the 13th O. M. R., while passing through Claresholm from Calgary to Macleod, last Wednesday, was met at the station by a number of his friends.

It is reported that R. P. Kingscote, a partner in the Kingscote & Boddy Ranch, now a high officer of one of England's greatest dreadnoughts, the "Emperor of India," will soon be married in England. Congratulations will be in order from Mr. Kingscote's many friends in this district.

The C. N. R. grating gang, who are working on the Calgary-Macleod line, have reached High River.

Some contractors has started, in various towns, over threshing operations being conducted on Sunday. Parties engaging in this sort of work without permission from the attorney-general's department, are liable to prosecution under the Lord's Day Act. In England, the rector of Thornham Magna, in Suffolk, first conducts a brief Sunday service in the field and then heads a band at the work. "Sacrifice the work so to speak."

The first gasoline to be refined in Alberta is now on the market in High River. On account of the big demand for gasoline for threshing purposes there is now a shortage, and when Geo. Young found he was not going to have enough to supply the demand he made a flying trip to Southern Alberta oil well and contracted for their total output till his supply would arrive. He now has teams hauling from the well and the gasoline is giving perfect satisfaction where it has been used. It is being used at the Ford garage and works as well as the gasoline from the other companies - High River Times.

Born, on Saturday, to Mr. and Mrs. T. L. Bernard, a daughter.

Mrs. G. M. Gledy was a visitor to Calgary last week.

The Ladies' Aid of the local Lutheran Church will hold a sale of aprons and food in the sample room of the old Alberta Hotel (in same building as the Claresholm Advertiser office), on Saturday, Nov. 6th, commencing at noon. The ladies are hoping that there will be a good attendance at their sale and that everything will be disposed of to the satisfaction of both buyer and seller.

Owners of threshing outfits are making complaints over the serious shortage of gasoline. Some outfits, we are informed, are held up for want of it, while others are forced to drive long distances to get the stuff to keep the wheels moving. Mr. Finstad, for one, has had to send teams to Carmangay and Nanton in order to keep up his supply of oil. One would think that the oil wells would be taking advantage of the shortage to put their product on the market. Where are Dingman people with their gasoline well that we do not hear from them? It is too bad that the shortage of oil is on so short allowance and some remedy should be found immediately.

The sand storm which passed over Claresholm, Tuesday, had some effect on it.

Mayor Holmes returned on Friday evening's train from Bassano, where he attended the Convention of the B. C. Municipalities.

The new winter schedule of the C.P.R. will take effect at midnight Sunday.

The name of Frederick Louis Cannon, of Claresholm, appears in last Thursday's casualty list, as having been injured by the bursting of a shell. They call his trouble conjunctivitis. There must be a good many of the boys suffering from that complaint in Europe these days. All the more reason why we at home should contract patriotic funditis.

Rev. Mr. Huestis, secretary of the Lord's Day Alliance, addressed a meeting in the Presbyterian Church on Tuesday night. The reverend gentleman made reference to threshing operations being conducted on Sunday in this district and asked members of the congregation if they thought it was necessary. On the opinion being expressed that it was not, he urged his hearers to see to it that the law was enforced and respect paid to the day of rest. Mr. Huestis was elected secretary-treasurer of the local alliance, Mr. Jas. McKinnay being president.

The casualty list of the 31st Battalion, which many of our Claresholm boys are in, show that there have already been three by German weapons. Frederick Cannon, better known as "Sooty," who was formerly of the Bank of Commerce staff here, is reported to have been injured by the bursting of a shell. Leonard Eric Callahan, known as "Pat," and formerly junior clerk of the Bank of Commerce, is reported as killed. Arthur J. Grove, who was foreman of the Review printing department, is reported as killed.

O. L. Heinicke made a motor trip to Carmangay, on Tuesday, returning the same day in the severe dust storm.

J. L. Ellund and son Carl made a business trip to the Stately district on Saturday.

L. G. Shortreed's father, Mr. G. Shortreed, died at his home in Barrie, Ont., on Sunday last.

Mr. Williams, of Edmonton, is shipping a steam threshing outfit to the Claresholm district and will commence threshing in a short time.

The Women's Institute, of Claresholm, is planning to rent a house in town which will serve as a ladies' waiting room. Women coming to town with children will find it convenient for their accommodation. Sandwiches, cake and tea will be served to those who desire them at a minimum price.

Mr. Beaver, as he was motoring to Woodhouse on Wednesday afternoon, ran his auto into a sandbank with the result that the car overturned, throwing Mr. Beaver out and cutting his head badly. Dr. McMillan is attending the patient.

Nurse Melbourne, on Friday last, was driven to attend a typhoid patient at the home of Mr. Leopold, had a dangerous runaway. One of her arms was pulled out of its socket.

Mr. Thos. Guy, proprietor of the Queen's Hotel, has sold his car and bought a new 1916 model Buick car.

The buyers of new Overland cars this week are: David Williams, L. Pfeiffer, Norman Averell and John Nordland.

Sid Chilton, who has been visiting his cousin, T. Chilton, for the past two months, left on Wednesday for his home in Baker, Montana.

A. E. Hunter was a passenger to Calgary on Wednesday evening.

Mrs. N. Noble is visiting friends in Calgary for a few days.

Mrs. McDonald of the "44" ranch went to Calgary with her horse who is very ill and will have to undergo an operation.

Mr. Thos. Moore and son, accompanied by Mrs. I. Moore, Jr., made a business trip to Calgary on Wednesday evening.

A very successful patriotic tea and dance was held in Parish hall last Saturday evening.

Rev. Mr. Marr, provincial secretary of the Bible Society of Alberta, addressed a meeting of the local branch in the Methodist church on Wednesday evening. A fair crowd turned out and Mr. Marr's address was both interesting and instructive.

Next Sunday will be missionary day in the Methodist church. Rev. Mr. Cobbleick, M.A., B.D., of Lethbridge, will conduct the service both morning and evening. Rev. Mr. McNeven will take Mr. Cobbleick's pulpit in Lethbridge.

Frank Thill, a well-known farmer living near Stony Plain, 30 miles west of the city of Edmonton, had his separator blown to pieces this afternoon, by a stick of dynamite. The dynamite must have been in the last sheaf that was put into the separator, for the men had just started feeding into the machine and had walked away from it to go to lunch when the explosion occurred. The separator was completely wrecked.

To build up a prosperous, successful community, the citizens—farmers, mechanics and farmers—should have strongly developed foresight as well as hindsight. Both are necessary. Hindsight means profiting by experience; foresight enables us to grasp future possibilities and see opportunities before they pass by. Now the very best market for a farmer is the home market. Make Claresholm a larger, busier city and it will in turn become a large outlet for the Claresholm farmer. The greater the city the greater the market and the higher the prices for the farmer. Calgary has put, and is putting, hundreds of Calgary farmers on Easy Street. The same thing will happen here if the farmer uses and develops foresight. Know then that sending money out of town for articles that may be purchased here is plain suicide and killing or crippling the goose that lays the golden eggs. If all the money that is made in this district was spent here, we would have a population of about 2,000 instead of 1,000. This means already that the local market has been cut down 50 per cent. or more just through lack of foresight in the benefit to be derived from a home market. What we want to urge on our readers is to see and know that by building up the home town they are putting money in their own pockets and putting themselves in the way of getting better prices for their dairy and garden stuff.

Geo. H. Page, of Calgary, is in town to-day on business.

Mrs. F. W. Elliott, of New Oxley, was in town on Tuesday.

G. F. Clark, of Calgary, was here on Wednesday on business.

W. C. Wood, of Calgary, came in on Thursday. He may locate in Claresholm.

The City of Calgary has won the first round in the battle with the Gas Co.

A parlor social, under the auspices of the W.C.T.U., will be held at the home of Mrs. Milnes tonight (Thursday).

Mr. C. Clark, of Calgary, was here on Wednesday on business.

W. C. Wood, of Calgary, came in on Thursday. He may locate in Claresholm.

The City of Calgary has won the first round in the battle with the Gas Co.

A parlor social, under the auspices of the W.C.T.U., will be held at the home of Mrs. Milnes tonight (Thursday).

Mr. C. Clark, of Calgary, was here on Wednesday on business.

## Financing the Grain Crop

In the opinion of the Calgary News-Telegram, the most important outstanding question which the Western people have before them today is the market and price for the immense grain crop which has been grown. Next in importance are the methods to be used in financing this crop so that the grain grower will win in spite of all contending or conflicting agencies. These are matters which concern every farmer and every business man in Western Canada, for upon a satisfactory solution depends the local prosperity of this country, not only for to-day, but for many years in the future. So enormous has been the crop in the prairie provinces this year that, if the products of it get a price in accordance with world war conditions, it means continued prosperity for Western Canada for the next ten years. Many complications have to be faced in order to get that price, and the thing to do in the meantime is to provide such financial arrangements as will protect the farmers in the event that the wheat can be marketed to the best advantage.

For the first time in history, the Canadian National Government has supplied a remedy. The Government has decided to be the banker for the farmer; the chartered bank is placed in the position of a representative of the Dominion Government, and the grain grower is absolutely assured of sufficient credit to carry him until he decides to sell his wheat. His grain is the security of the bank and of the Dominion Government, and under the arrangement no one man, alone, in order to give the farmers and business men of this province a clear conception of what the Government has done to finance the crop and to take care of the needs of the farmers, until transportation conditions improve, the News-Telegram asked the Hon. Robert Rogers, the most active member of the Dominion Government from the West, for a plain statement of the arrangement. This request was made because of numerous inquiries from farmers all over the province, who were not quite clear on the subject. The statement from Mr. Rogers will be found below:

Ottawa, Oct. 15, 1915  
G. M. Thompson, News-Telegram,  
Calgary, Alta.

The minister of finance has arranged, under the Finance Act, to make advances in Dominion notes of the banks upon the security of grain in terminal and elevator receipts, upon the presentation of warehouse receipts for grain and bills of lading covering the grain, and representing a value of 20 per cent. in excess of the amounts advanced. This is to say, the Government will advance to banks 80 per cent. of the value of the grain offered as security. The effect of this is to place the banks in a position to carry the grain until sold. The minister of finance has appointed Mr. C. L. Ball, of Winnipeg, an experienced banker, to act in conjunction with the assistant receiver-general's office at Winnipeg to make the advance and taking the security from the banks.

ROBERT ROGERS,  
Minister of Public Works.

## Released to Fight at Front

On the understanding that he will act as one scout for overseas service, John D. McKinnon, former manager of the Union Bank's branch in Hamilton, is to be released from Kingston penitentiary, where he is serving a three-year term. This is the first case of a man being released from the penitentiary to go to the front, but the department officials believe that the circumstances justify the action they have taken. The charge on which McKinnon was convicted was the embezzlement of \$12,000, several weeks ago.

## General News Notes

For the shooting of Miss Cavell, in Brussels, by German authorities, because she assisted prisoners to escape, every official connected with this brutal murder, should be marked and when the time comes to balance accounts they should get their good and plenty—and then some.

Hops have been bringing \$9.50 per hundred on the Winnipeg market for the past week.

"How many strawberies should I use?" asked the young wife of her mother as she began making her first shortcake for the only man in the house. "Put in as few as you like the first year," said the experienced woman. "It's too much in love now to notice the difference. After you've been married a year you'll have to use a lot of them."

Canada's wheat crop is now estimated at 336,258,000 bushels. This is more than double that of last year and 45 per cent. in advance of the previous highest yield. Patriotism and production goes hand in hand in Canada.

L. C. Charlesworth, C.E., of Edmonton, is to succeed John Stocks as deputy minister of public works.

In Toronto, on Oct. 26th, the Grand Jury returned a true bill on six counts against Governor, David S. and Clarence McCutcheon, charged with conspiracy to defraud in connection with various land deals in the west and east.

What Russia has to contend with in the shape of traitors and spies within their own ranks, was made public. Lieut-Col. Miasniedoff, who was highly esteemed and respected in Russian court and military circles, was found to be in the pay of the German Government, and supplied them with every intended word on the part of Russia. He and an accomplice were found guilty, they were hanged. On one occasion he held back a Russian general for 24 hours and saved the German army from complete destruction.

The minister of labor, Hon. T. Crothers, predicts a scarcity of labor in the east during the coming winter. He states that the big employers of labor, including lumber companies, are looking for men and are having a hard time securing them. An appeal has been made to bring back the men who went west for the harvest.

The discovery of gold-bearing quartz, at a depth of 2,000 feet, has been made in the well of the Stokes-Stephens Co., south of Lethbridge. Dr. J. G. McNaught came to the city this week with a sample of the quartz, and a test showed the yellow strain in it to be pure gold. He says that the drill has apparently struck an extensive stratum of this quartz, and it appears to be rich in gold. He doubts whether it will be a feasible proposition to develop it at that depth, however.

British submarines have sunk four German steamers in the Baltic.

The department of agriculture is displaying commendable interest in the threshing operations of Southern Alberta. Realizing the urgent need of threshing outfits the department has sent five machines into the west country, and on Monday a hundred men, with positions already secured, were dispatched to the south to engage in threshing operations. A hundred men are to be sent to Medicine Hat district for the same purpose positions having already been secured for that number. The department is wide-awake in its efforts to assist the southern farmer and that its arrangements for threshing outfits and threshing help is appreciated is needless to say.—Medicine Hat News.

## Ratepayers' Annual Meeting

The annual meeting of the ratepayers of the Town of Claresholm will be held in the council room on Monday evening next, when reports of the business for the past year will be presented for the consideration of the ratepayers.

Nominations will be held on the first Monday in December and the election one week later.

The retiring councillors are J. Mitchell, J. B. Boese and Mayor James. We regret that the latter, owing to absence, will not be up for re-election, and it will be the duty of the ratepayers to select a successor. Mr. Mitchell, as chairman of state works, has handled that difficult department in a way that is not only a credit to himself but satisfactorily for the town. Mr. Boese, on light, has by uniform tact and practical methods not only harmonized the working of his department but has been able to effect a substantial saving in operation. We feel that it will be in the interests of the town that these two gentlemen again stand for re-election.

Meers, Tillotson and Simpson, the chairman and secretary of the school board, are the retiring members. Both these gentlemen have had large experience as trustees and no further argument for their reelection is necessary than that the standing of the Claresholm school is among the highest in the province.

## Annual Convention of Alberta Municipalities

The Eleventh Annual Convention of Alberta Municipalities was held in Bassano on Wednesday and Thursday of last week. At the election of officers, which was held on Thursday morning, the following were chosen for the ensuing year:

President—Mayor M. C. Costello, of Calgary.

First Vice-President—Mayor N. Holmes, of Claresholm.

Second Vice-President—Mayor A. C. Hawthorne, of Medicine Hat.

Secretary—Mr. Allan, of Red Deer, re-elected.

One important point brought up was to ask the Government to attach coupons to all agreements of sale and when the agreement was put through the ship would be forwarded to the towns for assessment purposes and would enable them to keep the assessment up to date.

Another was the villages want the right to place a business tax. The towns have this right and some of the cities through their charters. Calgary is about the only city that has it in force, although the assessment committee recommended that this right be given a year ago.

Mayors Hawthorne and Costello placed a resolution before the meeting, which was put through, and which asks the co-operation of the Legislature and the Federal Government in connection with the drilling of oil wells, to see that the law in regard to the conserving of gas is lived up to, that the pipe used is such as to prevent leaks of gas and also in the matter of exploiting the province's gas. They urge that it be conserved for the province.

Mayor Holmes reports that the convention was a very profitable one, and many new ideas were expressed during the various discussions which followed the reading of papers. He is of the opinion that these conventions are very helpful to men engaged in municipal work and should be well attended by those who are connected with the work of administering the affairs of the community.

Canadian Pacific Railway Agents will gladly give all particulars and reserve sleeping car and steamship berth.

R. DAWSON,  
District Passenger Agent, Calgary, 28-3

### Patriotic Workers

From a small Alberta town comes the story of all another line to work to swell the funds of the Patriotic Fund. Ladies at this point were presented with lumber from the local dealers, necessary hardware from the local stores, and the freewill offerings of the town to erect several small granaries about the town. Six granaries, holding 100 bushels each, were built. One was placed at the town scales, one at each elevator, and one at a dairy barn. Farmers were asked to contribute wheat by placing it in these granaries in amounts as they felt free to give. No particular results have yet reached us, but, knowing the spirit of the western farmer, we anticipate that the response would be a liberal one.

## RECRUITING

To a section of the Canadian press recruiting never seems to be satisfactory. There is always a reason for things and there is a reason for lack of interest in recruiting. One of these reasons, so far as Canada is concerned, is because the men object to death after months of wasteful waiting for the order to go forward. The case of the 12th C.M.R. is one in point. That body was recruited and kept waiting nearly a year in Calgary before they were ordered to proceed even as far as England, and even then they had to go as infantry. Yet all this time Kitchener was in need of more men at the front, and the men knew it. Is it any wonder they chafed at the delay? It is all very well to say that discipline and system must be maintained. Damn the "system" that keeps the men from doing what they enlisted to do—FIGHT. They did not enlist to be kept in Canada for months after they were trained for their work. This waiting game is the biggest deterrent to recruiting in Canada. Rather than submit to it dozens of men, earlier in the year, bought their way out of the ranks and went back to work. If the military department want to encourage recruiting let them announce that after a regiment has been recruited just so many months it will be allowed for training in Canada, so many weeks in England, and then off for the front. Let them be properly trained by all means, but not out of the unnecessary and vexatious delay, then men who mean business will come forward to do their share and do it willingly and gladly for the honor of the old flag. Men have time to fight but no time to waste; there is a certain job to be done for the empire, they want to do it and get back to private business. Stop the waste and recruiting will flourish.

The suggestion that the Duke of Connaught be placed at the head of the Canadian army is a good one and will win with the approval of all who put the efficiency of the Canadian forces before party interests. If we want to see Canada take her proper place in this big scrap the change cannot be made too soon.

## TEN GOOD REASONS

Why I am subscribing to the Canadian Patriotic Fund to the extent of my ability:

- 1—I love my country, and to the Empire of which we are a part, either to fight myself or help to make it possible for others to fight in this supreme struggle.
- 2—As a Canadian I have enjoyed the protection and privileges of British citizenship and have never been called on in the defence of the Empire.
- 3—I have paid no war tax. My mother country has borne the burden of my protection alone.
- 4—In this hour of trial I desire Great Britain to realize that every Canadian is supporting and upholding her cause.
- 5—The war in which we are engaged is a righteous cause, a struggle for Truth, Liberty and for the sacredness of Treaties and the given word.
- 6—I cannot care myself but I can help to make it possible for others to go by guaranteeing that their families will be provided for in their absence.
- 7—Every soldier who has gone from Canada is as truly my representative as he who went from Kent county.
- 8—The object of the Canadian Patriotic Fund is to make provision

for ALL families of soldiers going from Canada to take part in the present war.

—Those who have gone to the front are making greater sacrifices than anything I can do at home.

—An unparalleled crisis in the world's history calls for supreme sacrifice on my part. I must do my duty. I MUST FIGHT OR PAY.

—Exchange.

## Invents Clever Device

A device which will probably mean a great saving to the farmer has just been invented by F. Hosel, of Claresholm, in a jack for the purpose of removing the wagon box from wagons. By this device, which consists of two upright horses with rope attachments, the wagon box is easily lifted from the wagon with the work of but one man.

Previously, the farmer was compelled to get help when he drove into the farm to take the box off the wagon when he desired to put on a grain tank or to draw lumber or use the wagon as a hay-rack. By means of this device which Duncan Watson, a partner in the invention, says will be sold for \$10, the farmer is saved all this labor, for he can alone and unaided make the change for his wagon frame.

## Distribution of Seed Grain and Potatoes

By instructions of the Hon. Minister of Agriculture a free distribution of superior sorts of grain and potatoes will be made during the coming winter and spring to Canadian farmers. The samples will consist of spring wheat (about 5 lbs.), white oats (about 4 lbs.), barley (about 5 lbs.), and field peas (about 5 lbs.). These will be sent out from Ottawa.

A distribution of potatoes (3 lbs. samples) will be carried on from several of the Experimental Farms, the Central Farm of Ottawa supplying only the provinces of Ontario and Quebec.

Each application must be separate and must be signed by the applicant. Only one sample of grain and one of potatoes can be sent to each farm.

If both samples are asked for in the same letter only one will be sent. Applications on any kind of printed form cannot be accepted.

The destruction by fire of the Central Farm at Ottawa, which contained grain-cleaning machinery and a large stock of seed grain for distribution, may make it necessary to curtail the distribution to a certain extent. We shall list as many (as possible) of the applications which conform to the rules, but requests received after the end of December will probably be too late. Samples cannot be sent in response to applications (no matter when received) which fail to state clearly the needs of the applicant, his experience in crop-raising and the character of the soil on which he intends to sow the seed.

All applications for grain (and applications for the provinces of Ontario and Quebec for potatoes) must be addressed to the Dominion Cereals, Central Experimental Farm, Ottawa. Such applications require no postage. If otherwise addressed delay and disappointment may occur.

Applications for potatoes from farmers in any other province should be addressed (postage prepaid) to the Superintendent of the nearest branch Experimental Farm in that province.

J. H. GRISDALE,  
Director, Dominion Experimental Farms.

In the 56 creamery operating in the province of Alberta, it is estimated that 7,900,000 pounds of butter were made and inspected by the Government during the past year. The largest concern is the Edmonton City Dairy, which averaged a carload a day.

Gen. Joubert, of Boer fame, is on his way to Saloniki where he will join the allies. There is still some ginger in the old Boer fighter.

Synopsis of Canadian Northwest Regulations

The sale of land of a family or any male over 21 years of age, land, timber, or other property, shall be made by the Government. Applications must be made to the Minister of the Interior, Ottawa, or to the District Agent for the District. Every application must be made in duplicate. The original must be filed in the office of the District Agent (not the sub-agent), on certain conditions.

Every male and female over 21 years of age, and every female under 21 years of age, who is a resident of the land in each of these years. A homestead may be made on a tract of land of not less than 160 acres, nor more than 640 acres. A homestead may be made on a tract of land of not less than 160 acres, nor more than 640 acres. A homestead may be made on a tract of land of not less than 160 acres, nor more than 640 acres.

A settler who has relinquished his homestead right may take a portion homestead in certain districts. Before he can do so, he must first have been a resident of the land in each of these years. A homestead may be made on a tract of land of not less than 160 acres, nor more than 640 acres. A homestead may be made on a tract of land of not less than 160 acres, nor more than 640 acres.

Every male and female over 21 years of age, and every female under 21 years of age, who is a resident of the land in each of these years. A homestead may be made on a tract of land of not less than 160 acres, nor more than 640 acres. A homestead may be made on a tract of land of not less than 160 acres, nor more than 640 acres.

A settler who has relinquished his homestead right may take a portion homestead in certain districts. Before he can do so, he must first have been a resident of the land in each of these years. A homestead may be made on a tract of land of not less than 160 acres, nor more than 640 acres. A homestead may be made on a tract of land of not less than 160 acres, nor more than 640 acres.

Every male and female over 21 years of age, and every female under 21 years of age, who is a resident of the land in each of these years. A homestead may be made on a tract of land of not less than 160 acres, nor more than 640 acres. A homestead may be made on a tract of land of not less than 160 acres, nor more than 640 acres.
